Analysis Wizard

Discussion: Think of the Analysis Wizard as the cherry on top of your sundae, or as the gravy on your meat and potatoes. Clearly, we like to eat here at Cow Sense central!

The Analysis Wizard is no work, but pure enjoyment of the effort you have put into your Cow Sense records. It gives you a variety of charts and tables to quickly analyze and compare your cattle. It rewards you with understanding of your data that you can apply in day to day management of your cattle. That's what Cow Sense is all about!

Since this tool is an analysis 'wizard', it steps you through setting up a chart or table, one choice at a time.

Start in a regular Cow Sense report by 'marking' a set of cows, calves, or bulls that is of interest. Select the cattle you want, then use the push pin to mark them. You can mark and unmark groups and individuals to get any analysis set you want. Please see the Cow Sense User's Guide, Chapter 5, page 95 for more information on using the marking tool.

Launch the Analysis Wizard from the Cow Sense Main Menu > Reports > Analysis Wizard or from the Icon Tool Bar. 

The first step you will choose to analyze marked cows, calves, or bulls. Click 'Next' to proceed with the wizard and choose the analysis type and variables as you move along.

Then sit back and enjoy the many charts and tables you can produce to slice and dice your data any way you want!
