

# Allflex EID-Visual Matched Sets

## General Description

The Allflex EID-Visual Matched sets are a combination of HDX High Performance Ultra EID tag with a matching Maxi Visual tag with corresponding laser/ink printed numbering. The full EID number is printed in the neck area of the visual tag. All tags feature Tamperproof design.

All orders are sent with a 3.5" floppy disk with a CSV (*comma delineated universal file format*) file listing each of the corresponding EID tags and visual tag by color. This information can easily be migrated or merged to an existing database or management program without any reading equipment.

## Options

The EID-Visual Matched sets are available in five customizable combinations. These include basic tags with a management number, to combinations with logos and reverse-side marked text. Available in seven colors.

## Packaging

The Matched Sets are packaging in a plastic tray in sets of five tags. The standard quantity per bag is 25 matched sets.
